

Tasks on Mobile

There are two major options when considering how to have your tasks on the go. There is a mobile app in the app store but it is created by a third-party but has high ratings. An alternative would be to add the website as a web app.

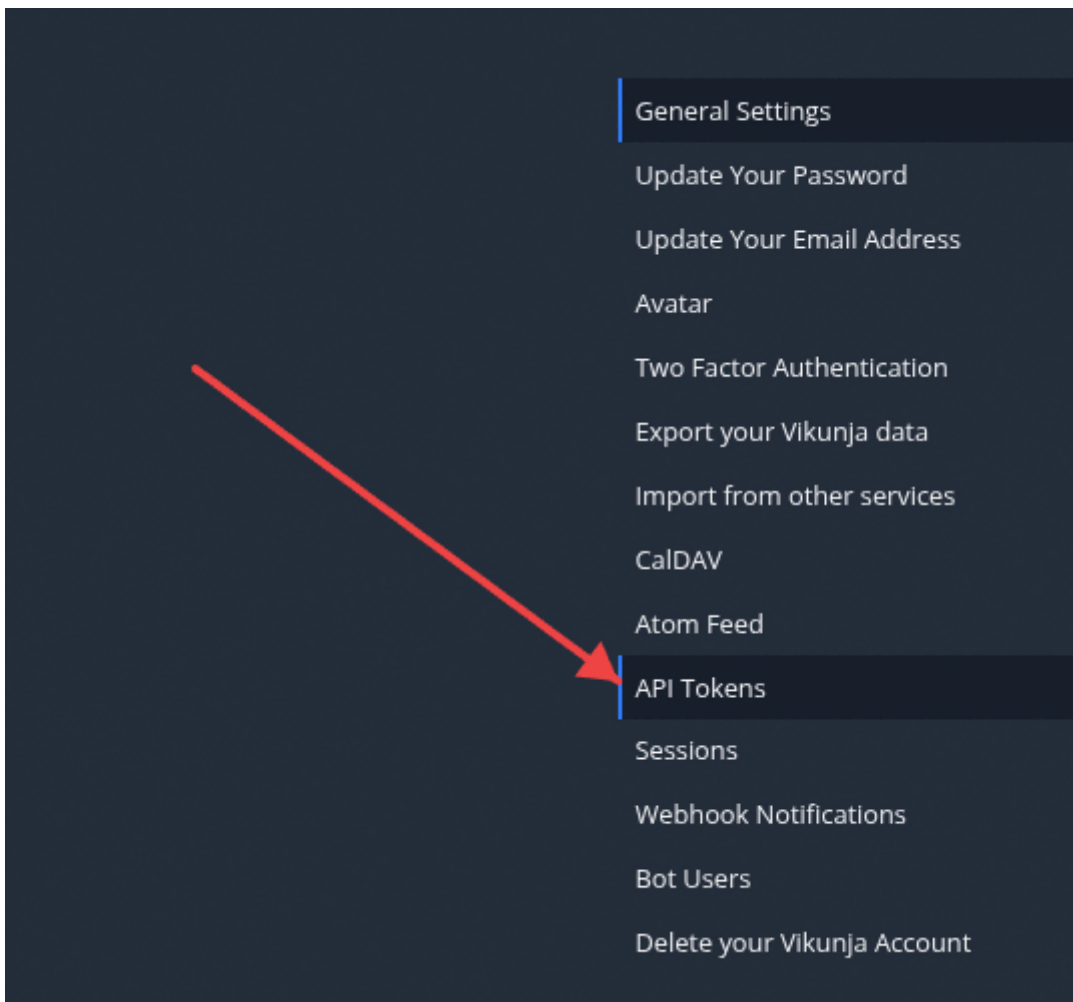

To add an the app you have to create an API Token

1. Open Settings

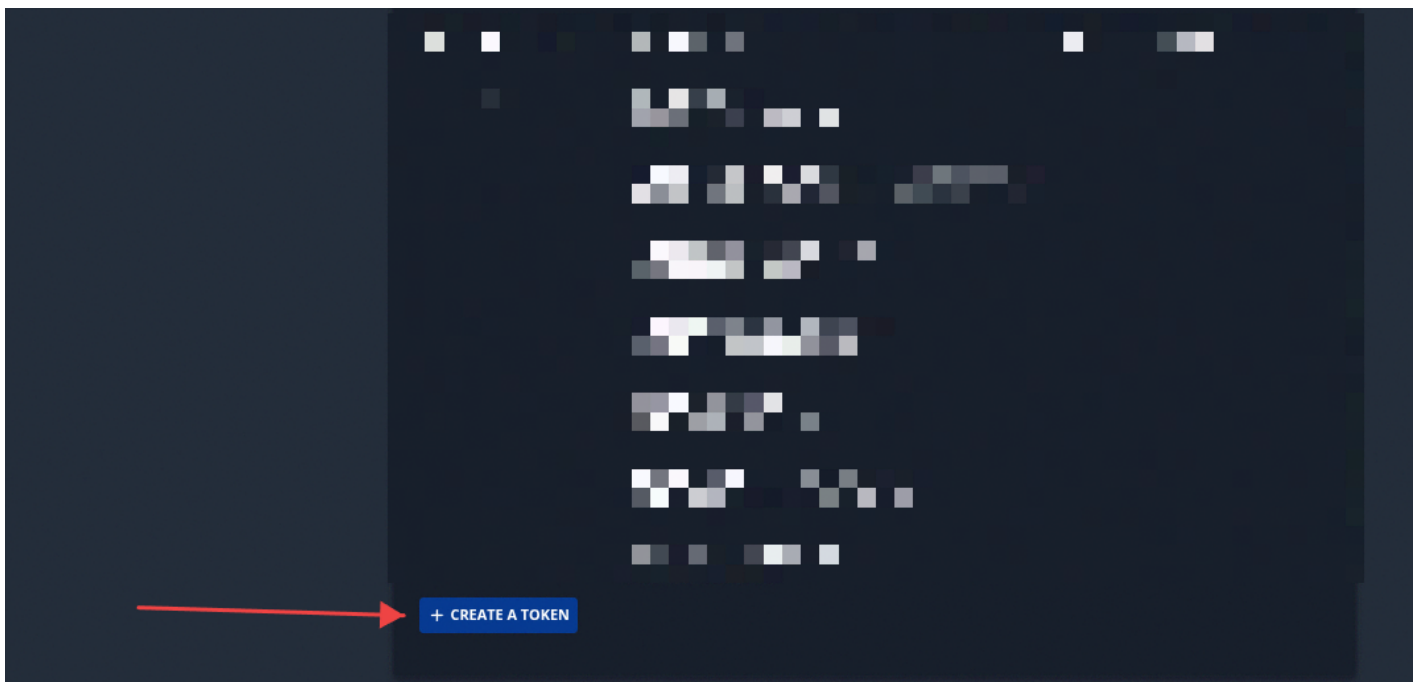

Click the 'Settings' option in the dropdown menu. On tasks.arc8productions.com

2. Click API Tokens

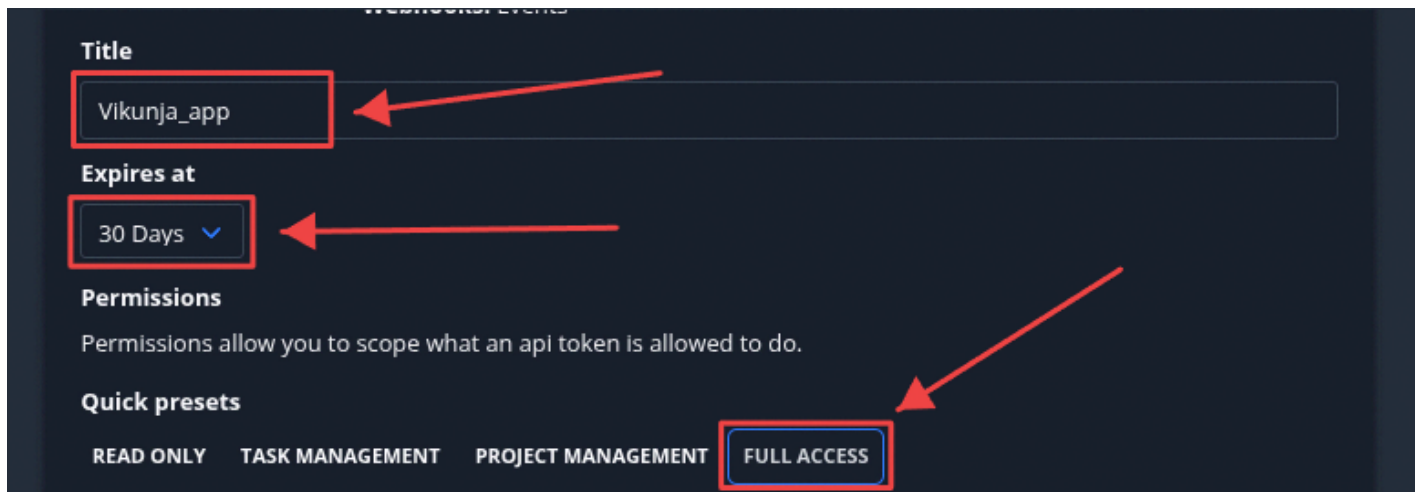

Click the 'API Tokens' option in the settings menu.

3. Create API Token

Click the "+ CREATE A TOKEN" button at the bottom of the screen.

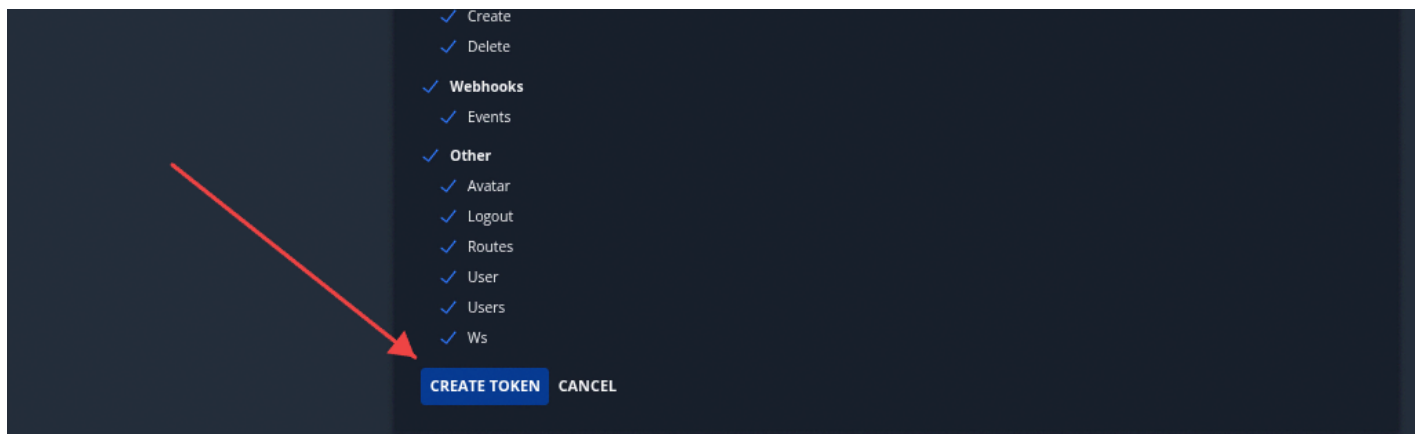

4. Select API token access level

The screenshot shows a dark-themed form for creating an API token. It has three main sections: 'Title' with a text input containing 'Vikunja_app', 'Expires at' with a dropdown menu set to '30 Days', and 'Permissions' with a description and 'Quick presets'. The 'Quick presets' section includes four buttons: 'READ ONLY', 'TASK MANAGEMENT', 'PROJECT MANAGEMENT', and 'FULL ACCESS'. Red boxes highlight the 'Title' input, the 'Expires at' dropdown, and the 'FULL ACCESS' button. Red arrows point from the right side of the screen to each of these three elements.

Click the 'FULL ACCESS' button under Quick presets to set the token's permission scope.

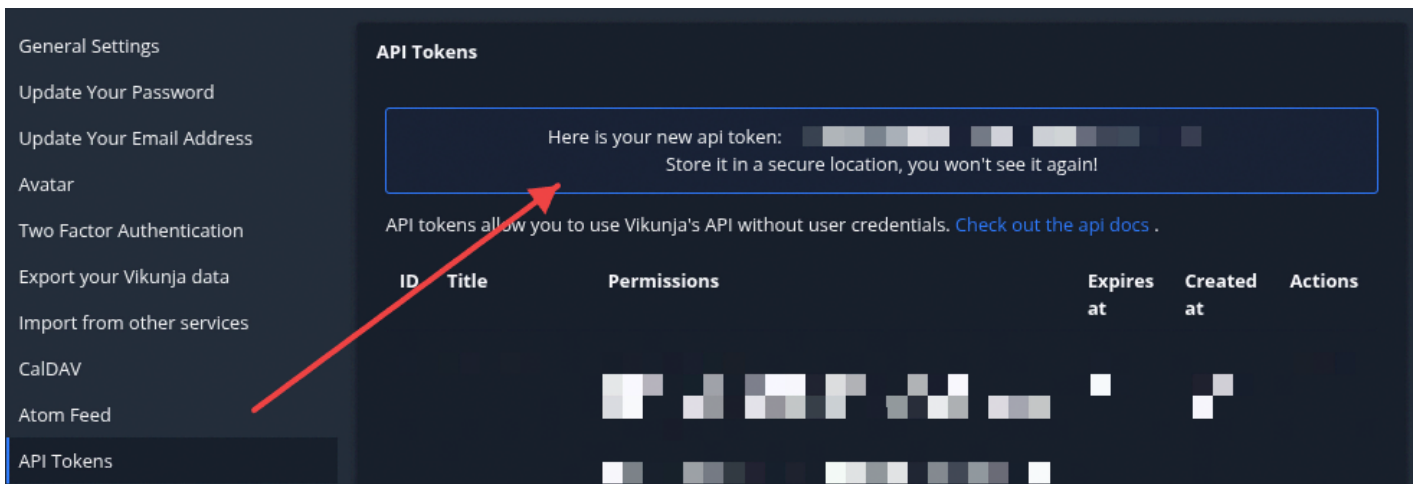

5. Create API Token

The screenshot shows a dark-themed confirmation screen for creating an API token. On the right side, there is a list of permissions with checkmarks: 'Create', 'Delete', 'Webhooks', 'Events', 'Other', 'Avatar', 'Logout', 'Routes', 'User', 'Users', and 'Ws'. At the bottom, there are two buttons: 'CREATE TOKEN' (highlighted in blue) and 'CANCEL'. A red arrow points from the left side of the screen to the 'CREATE TOKEN' button.

Click the 'CREATE TOKEN' button at the bottom of the screen to generate the API token.

6. Copy API Token

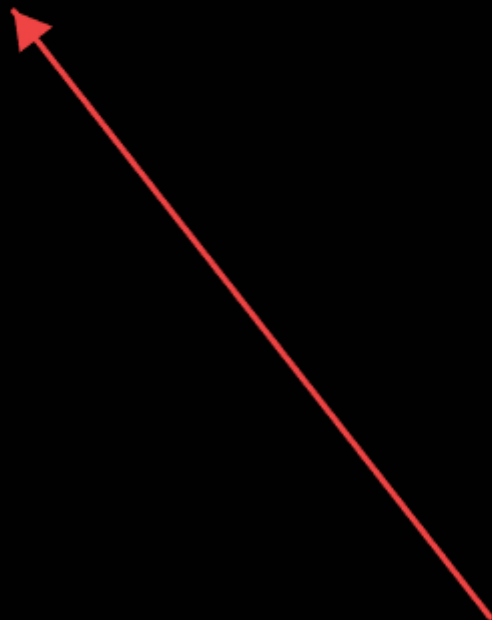

Scroll to the top of the page and select the newly created **API Key** starting with tk_... and copy it.

7. Open Vikunja app

16:57

Vikunja

Q Search

Click the Vikunja app icon on the home screen to launch the application.

8. Connect to Vikunja server

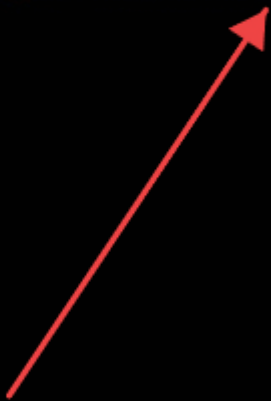

16:58

Welcome to Vikunja

Connect to your Vikunja server

 **Connect to Vikunja**

Need help getting started?

[Learn more about Vikunja](#)

Click the "Connect to Vikunja" button

9. Enter Server URL and API Token

16:58
